

PROFESSIONAL WILDFIRE HAZARD REDUCTION SERVICES

What We Do – Make your property defensible during a fire.

NorthTree Fire is a private company offering services to people living in wildfire-prone areas. We use our experience as wildland firefighters to implement projects that strategically remove brush and small trees around homes, infrastructure, and other assets - reducing potential wildfire intensities, without creating a moonscape.

Qualified Personnel

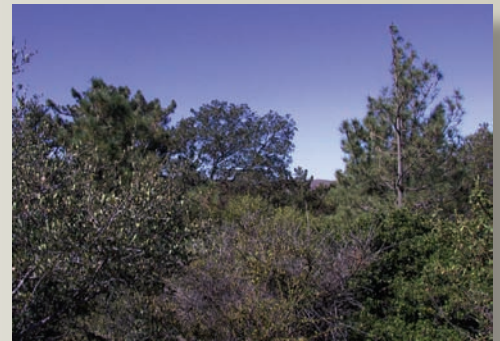

Our team is made up of fire professionals and veteran equipment operators with strong backgrounds in resource management and environmental compliance. Using decades of experience and well-defined Best Management Practices, our operators recognize and avoid sensitive areas, while efficiently reducing hazardous vegetation.

Quality Equipment

We offer a full suite of vegetation management services, including:

- Mechanical mowing (mastication) of brush,
- Hand thinning trees and brush,
- Piling and burning or removal of branches, brush, and small trees.

Our rubber-tracked brush-mowing machines maintain a very low ground pressure and can also be equipped with shears to thin 8" diameter trees. We also utilize excavator-based brush masticators that can shred 12" diameter trees. During the dry season, we can provide fire fighting equipment to meet fire standby requirements while our machines are working.

ABOUT NORTHTREE FIRE

NTFI provides resources and technical services to diverse clients including railroads, utility and pipeline companies, and private individuals. We staff quality equipment with experienced, courageous, and highly skilled people. When our equipment goes out the door, our field personnel are backed up with professional management, knowledgeable mechanics, and a 24/7/365 dispatch center.

PROVEN RESULTS

Our vegetation management clients include public agencies, private communities, Fire Safe Councils and individual property owners. All of these people have recognized the quality and expertise that we bring to bear on wildfire hazard reduction projects large and small.

Mount Hamilton Wildfire Hazard Reduction Project

Client - University of California

Date - 2005-2008

Prescription - Thin scrub oak and gray pine ladder fuels, chip, pile and burn slash

Between 2005 and 2008, NorthTree Fire designed, secured FEMA funding for, and implemented a complex wildfire hazard project at the University of California's Lick Observatory, near San Jose, CA. NorthTree crews thinned brush around the observatory facilities, and chipped or burned piles of cut material.

Lone Pine Brush Mastication Project

Client - San Bernardino National Forest

Date - 2005-2009

Prescription - Mechanical brush thinning along ridgetops & roads

This was a large project which used excavator-based brush masticators to mow brush, creating a landscape-scale ridgetop fuelbreak.

Jobs Peak Understory Thinning Project

Client - The Nevada Fire Safe Council

Date - 2006

Prescription - Mechanical brush mastication to thin understory vegetation

This project utilized our industrial brush mowers to clear small trees and brush, restoring more natural stand conditions in a Ponderosa pine forest.

Monterey Fire Safe Council Pile Burning

Client - Monterey Fire Safe Council

Date - 2005

Prescription - NorthTree Fire crews burned piles of small trees and brush thinned by CalFire project crews.
