

HIGH MOBILITY LOGISTICAL & CLERICAL SUPPORT SERVICES

What We Do – Facilitate management of complex situations

Clients use our equipment and expertise to manage complex projects. We provide onsite communications, IT, and graphics production services to support planning and project management on incidents including: wildland fires, emergency road or railroad repair projects, hazmat incidents, floods, and large special events.

Our mobile workspaces range from 3-person graphics production and satellite internet trailers to large 5th-wheel trailers with workspace for eight. We can support GIS and CAD mapping operations within our Office/EOC Units, or send dedicated GIS rigs equipped for the job.

Qualified Personnel

Our staff is comprised of skilled and experienced individuals who can do all of the following while maintaining a pleasant and professional posture:

- Build and operate a wired office environment in any location or any weather
- Set up radio repeaters, program radios, or analyze locations for temporary cell sites
- Program your Blackberry, fill sandbags, or cook meals for 100
- Make a map, survey snowed-in roads on foot, take good photos from an airplane
- Order portable toilets, set up a tent, run a planning meeting

Logistics are our business. Our people and equipment are supported by a dedicated and experienced logistics team of drivers, mechanics, dispatchers and IT gurus.

Quality Equipment

Our Mobile Office/EOC facilities are climate-controlled and roll with their own diesel generators.

Standard equipment includes:

- High-speed satellite internet with wireless networking
- Networked computers, with automatic data backup
- High-speed copying, scanning, color laser printing
- Laminating, and map or poster printing
- Multiple phone lines and satellite phone capabilities

ABOUT NORTHTREE FIRE

NTFI provides resources and technical services to diverse clients including railroads, utility and pipeline companies, and private individuals. We staff quality equipment with experienced, courageous, and highly skilled people. When our equipment goes out the door, our field personnel are backed up with professional management, knowledgeable mechanics, and a 24/7/365 dispatch center.

PROVEN RESULTS

Frazier Slide Reconstruction Project

NorthTree has the privilege of serving as an exclusive emergency response contractor for the Union Pacific Railroad. We help run massive emergency reconstruction projects like the 2008 Frazier Slide - which closed UPRR's Oregon Trunk line for over 3 months.

On the Frazier Slide, one of NorthTree's key roles was to compile intel and facilitate daily briefings between all major cooperators. We created maps and aerial photography that UPRR's project managers and contractors used to develop a common language and communicate about a complex and dynamic situation.

We also provided radio repeaters, staffed lookouts and traffic control on the slide site, provided a full EMS/rescue division, and documented all daily work of over 150 pieces of heavy equipment and 3 simultaneous large quarry operations.

Night operations on the Frazier Slide
